HARDING LEADS IN WATER CONSERVATION INITIATIVE

Harding Company is taking a leadership role in the development of best management practices for Barnett Shale exploration and production to ensure that water is managed in an efficient and responsible manner, according to Rick Harding, president.

“We are proud to be a founding member of the Barnett Shale Water Conservation and Management Committee, which was chartered in Spring 2006,” said Harding.

“We must balance our approach to water usage, conserving this valuable resource. We must protect water quality and create reuse and recycling technologies in order to provide solutions for effective water management,” he continued.

Harding Company has an excellent track record in all phases of oil and gas operations, including exploration, development and production as well as the development of associated infrastructure. Its safety record is unblemished.
